# Creating a MetaMask Wallet – Go-To Guide

## Desktop Chrome / Firefox / Safari Extension

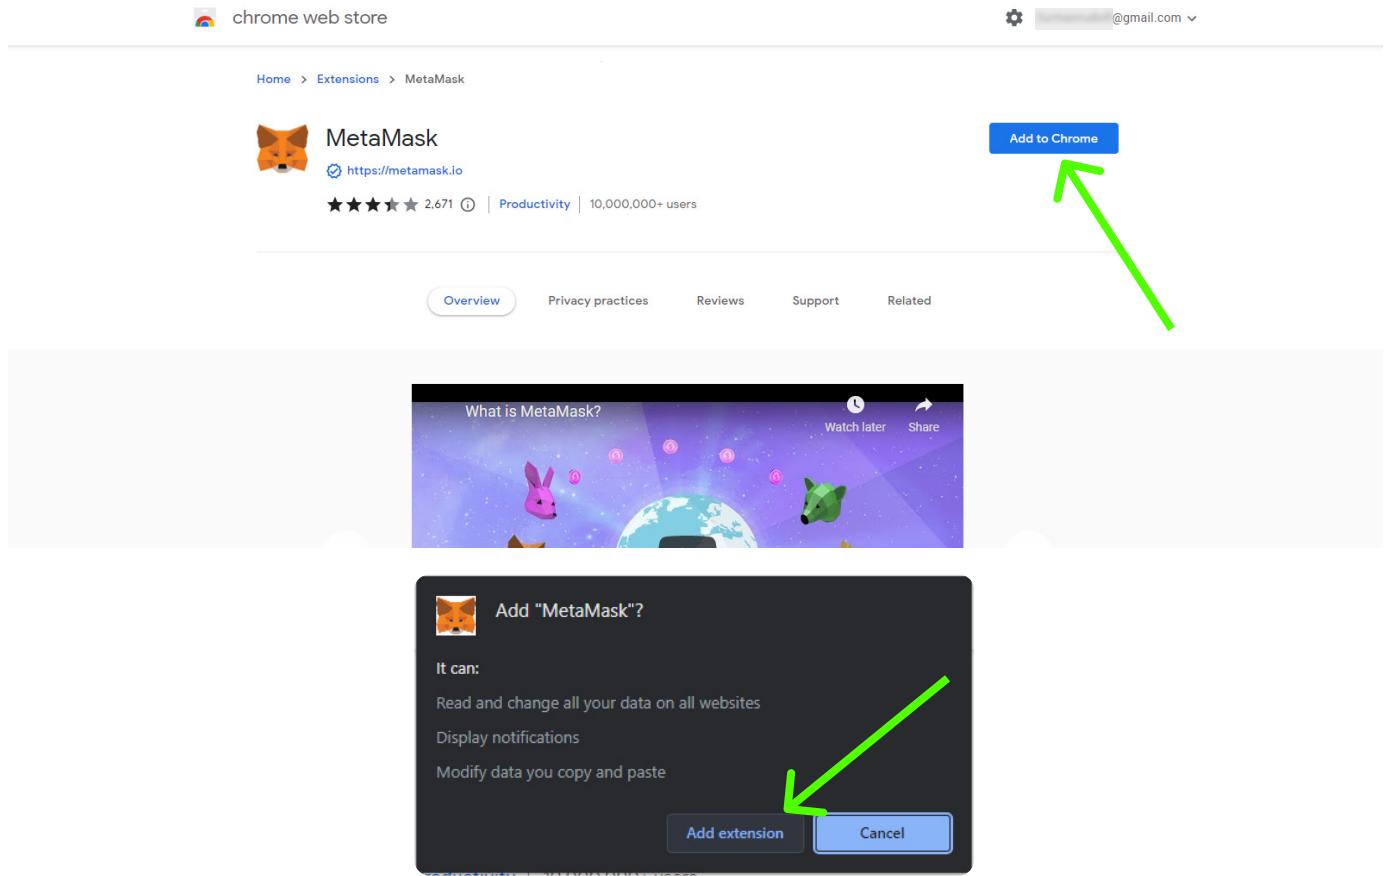

First of all, if you still do not have a wallet installed, you need to download it first. For Chrome, Firefox and other browsers, there is a special extension, and for smartphones (Android & IOS) – apps that can be downloaded from official stores. We suggest going to the wallet download page from the [official MetaMask website](#) & pick the platform you need, in order to avoid third-party applications.

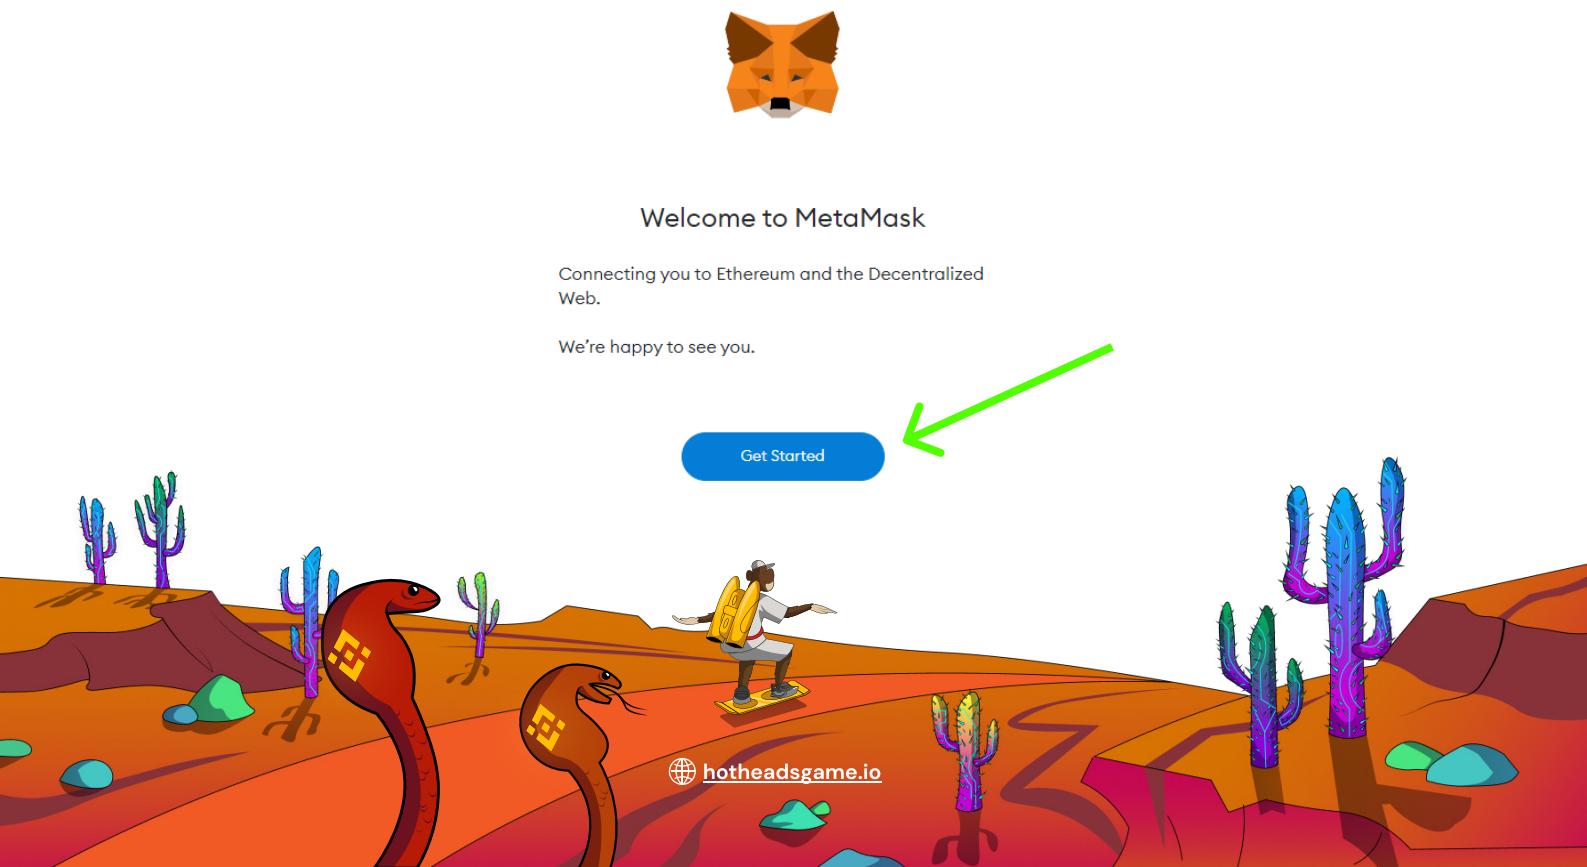

Next, we will take a look at the installation and operation of the wallet. We will use Chrome as an example. The process is very similar on other platforms, so you can follow this guide regardless of platform choice.

Select the desired platform on the MetaMask website and install the extension by clicking on the appropriate button.

Once the installation is complete, in the menu that opens, click the "Get Started" button.

Next, we are offered to restore an existing wallet or create a new one. Click "Create Wallet".

### New to MetaMask?

No, I already have a Secret Recovery Phrase

Import your existing wallet using a Secret Recovery Phrase

[Import wallet](#)

Yes, let's get set up!

This will create a new wallet and Secret Recovery Phrase

[Create a Wallet](#)

Accept the Terms of Use by clicking on the appropriate button, and we arrive at the next menu, where you need to come up with a password of at least 8 characters. For security purposes, we suggest coming up with a password that includes numbers, mixed case letters and symbols. It's best to write the password down somewhere — a notepad works. Accept the Terms of Use once again and click "Create".

### Help us improve MetaMask

MetaMask would like to gather usage data to better understand how our users interact with the extension. This data will be used to continually improve the usability and user experience of our product and the Ethereum ecosystem.

MetaMask will...

- Always allow you to opt-out via Settings
- Send anonymized click & pageview events

- Never** collect keys, addresses, transactions, balances, hashes, or any personal information
- Never** collect your full IP address
- Never** sell data for profit. Ever!

[No Thanks](#)
[I Agree](#)

This data is aggregated and is therefore anonymous for the purposes of General Data Protection Regulation (EU) 2016/679. For more information in relation to our privacy practices, please see our [Privacy Policy here](#).

## Secure your wallet

Before getting started, watch this short video to learn about your Secret Recovery Phrase and how to keep your wallet safe.

0:00 / 1:35

Next

### What is a Secret Recovery Phrase?

Your Secret Recovery Phrase is a 12-word phrase that is the “master key” to your wallet and your funds

### How do I save my Secret Recovery Phrase?

- Save in a password manager
- Store in a bank vault
- Store in a safe deposit box
- Write down and store in multiple secret places

### Should I share my Secret Recovery Phrase?

Never, ever share your Secret Recovery Phrase, not even with MetaMask!

If someone asks for your recovery phrase they are likely trying to scam you and steal your wallet funds.

In the next window, we are introduced to the Seed phrase. Simply put, a seed phrase is a sequence of randomly generated 12 words, which serves as an additional password, to restore the wallet in case you enter your MetaMask from a new device. Click "Next".

The wallet will automatically generate your Seed phrase for the wallet. It must be copied, or even better – written down in a notepad.

This phrase should not be disclosed to anyone and should ideally be stored in paper format or on an electronic storage device with no internet access. After you have copied and double-checked the Seed-phrase, click "Next". (In the photo below, you can observe the creation of the wallet. There will be no funds there, so do not try to restore it).

## Secret Recovery Phrase

Your Secret Recovery Phrase makes it easy to back up and restore your account.

**WARNING:** Never disclose your Secret Recovery Phrase. Anyone with this phrase can take your Ether forever.

scrap fog nature panther used strike  
water gym female wrong suggest  
drama

Remind me later

Next

Tips:

Store this phrase in a password manager like 1Password.

Write this phrase on a piece of paper and store in a secure location. If you want even more security, write it down on multiple pieces of paper and store each in 2 - 3 different locations.

Memorize this phrase.

Download this Secret Recovery Phrase and keep it stored safely on an external encrypted hard drive or storage medium.

COPY

In a new window, the wallet wants to check that we saved everything correctly and asks you to enter your phrase in the appropriate order. Enter and click "Confirm"

 METAMASK  
◀ Back

## Confirm your Secret Recovery Phrase

Please select each phrase in order to make sure it is correct.

drama	female	fog	gym
nature	panther	scrap	strike
suggest	used	water	wrong

**ENTER**

①

drama	female	fog	gym
nature	panther	scrap	strike
suggest	used	water	wrong

②

Confirm

Congratulations, you now have your very own crypto wallet.

### Congratulations

You passed the test - keep your Secret Recovery Phrase safe, it's your responsibility!

#### Tips on storing it safely

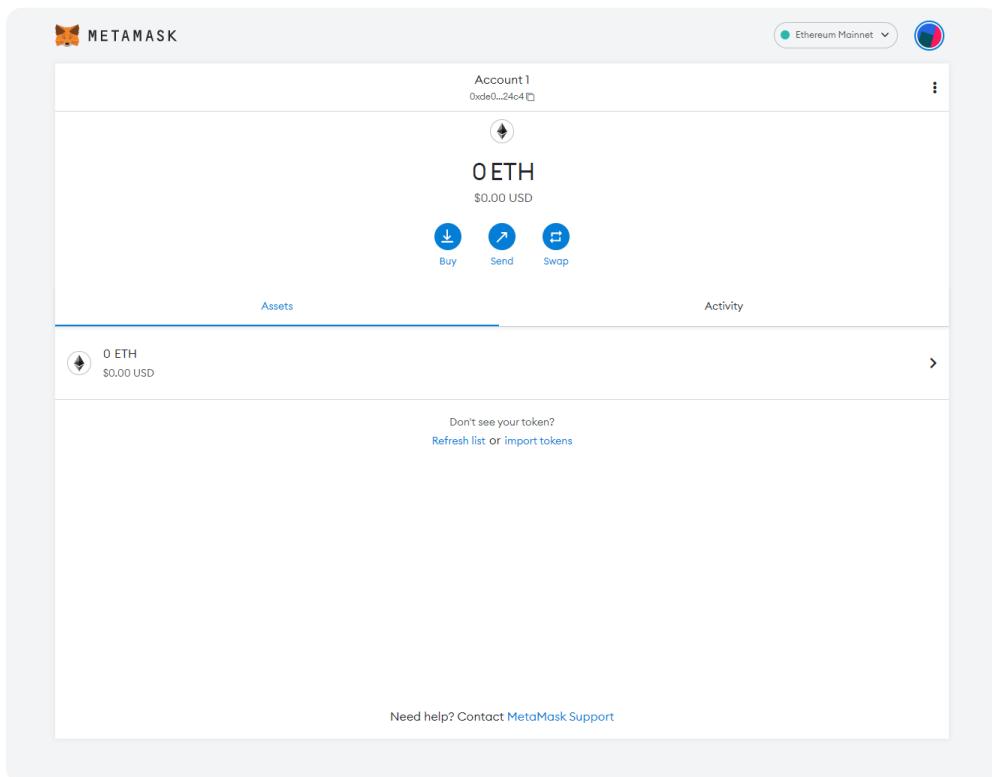

- Save a backup in multiple places.
- Never share the phrase with anyone.
- Be careful of phishing! MetaMask will never spontaneously ask for your Secret Recovery Phrase.
- If you need to back up your Secret Recovery Phrase again, you can find it in Settings > Security.
- If you ever have questions or see something fishy, contact our support [here](#).

\*MetaMask cannot recover your Secret Recovery Phrase. [Learn more](#).

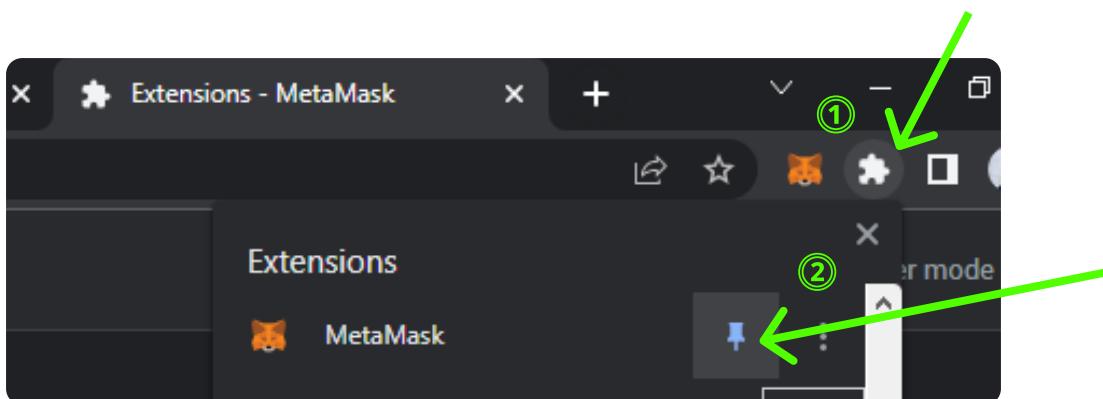

All Done

Our tutorial address is 0xdEO...24c4. Yours will be different!

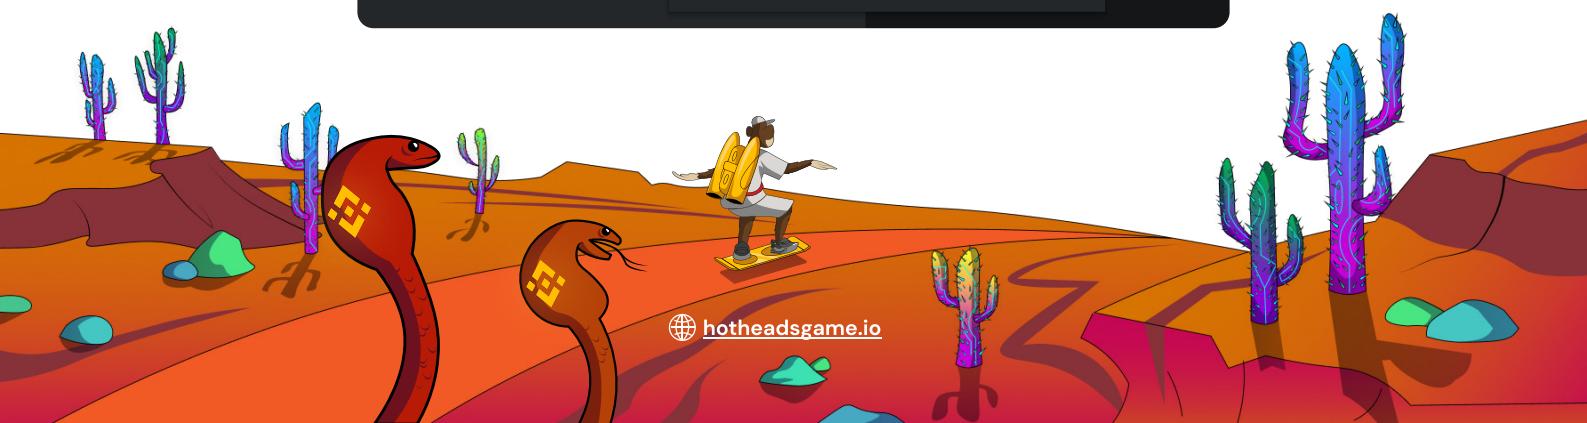

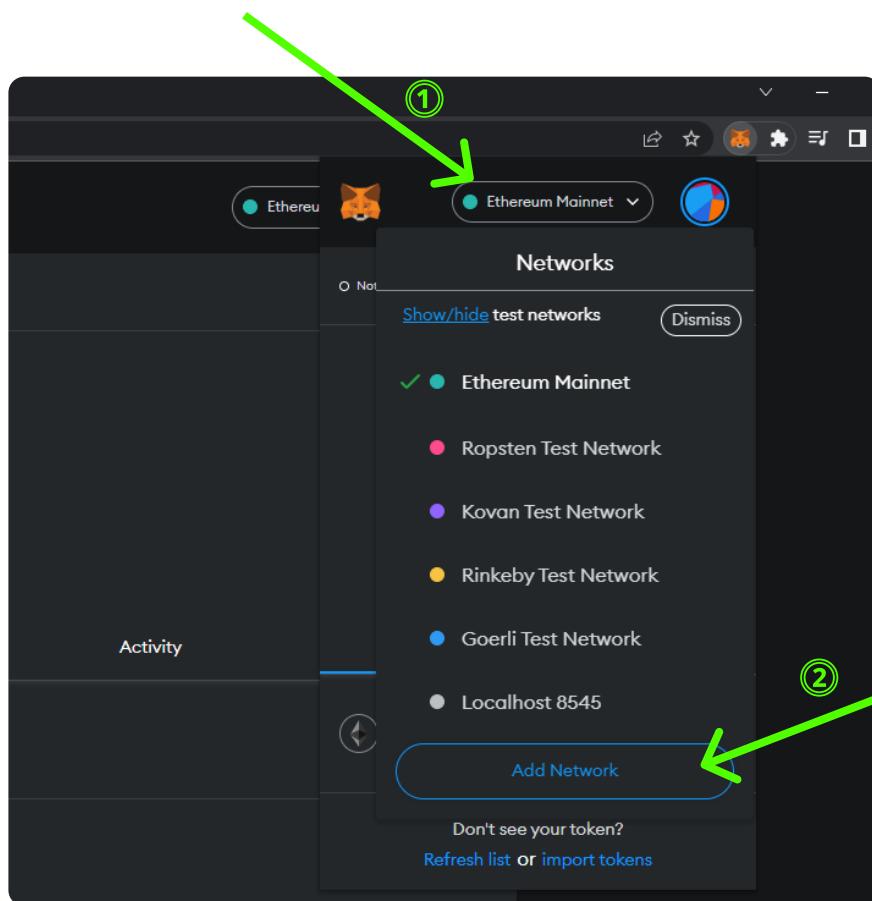

One can access MetaMask in the browser by clicking the Foxface icon on the top right.  
If the Foxface icon is not visible, then click on the puzzle piece icon right next to it.

# How to add the Binance Smart Chain on MetaMask

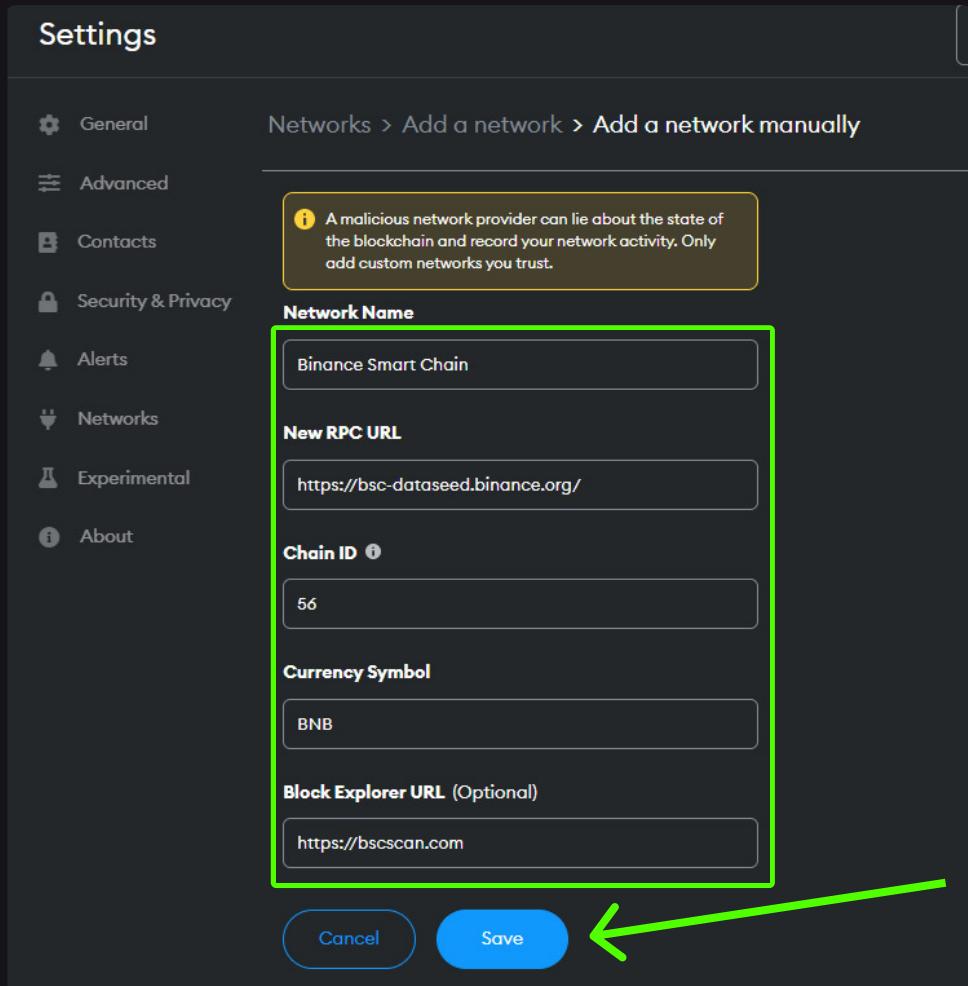

Initially, MetaMask only functions on the Ethereum (ERC-20) network, so in order to expand its functionality, you will need to add the Binance Smart Chain (BEP-20) network. As I mentioned earlier, since transactions on the Ethereum network are quite expensive and take a long time, many people use the BSC network, especially when transferring small amounts. Additionally, various tokens can be exchanged cheaply in this network.

So, let's move on to adding a new network. The Ethereum Mainnet network is selected by default at the very top of the extension. Click on it and in the window that appears, click "Add Network"

Then proceed to fill in all the data as per the screenshot below and click on the "Save" button once done. For your convenience, you can find all the necessary data below.

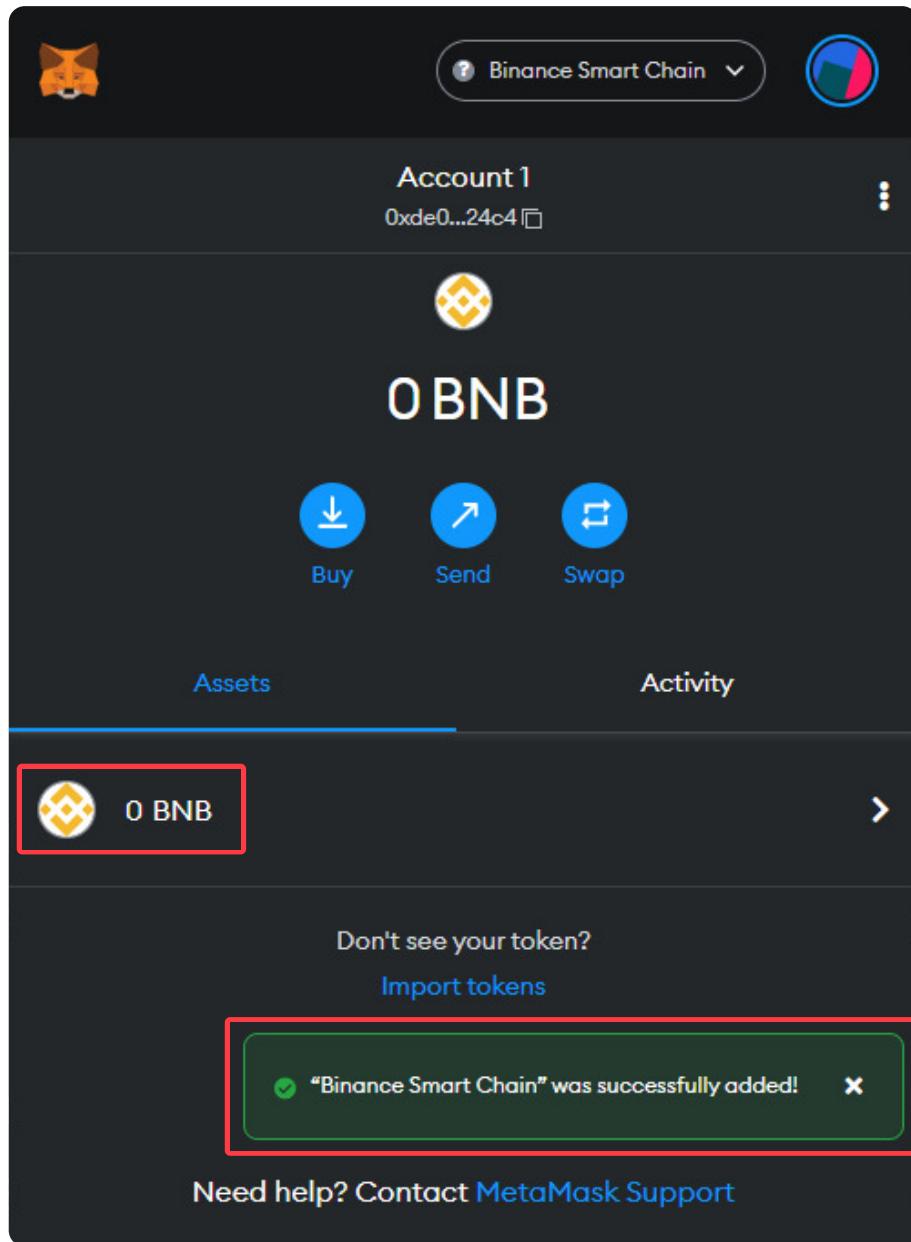

Network Name:	Binance Smart Chain
New RPC URL:	<a href="https://bsc-dataseed.binance.org/">https://bsc-dataseed.binance.org/</a>
Network ID:	56
Symbol:	BNB
Block Explorer URL (Optional):	<a href="https://bscscan.com">https://bscscan.com</a>

Once this is done, you will have successfully added the Binance Smart Chain network to your wallet, and you can now conduct transactions on it.

Upon adding that information, you will be brought back to the wallet screen. There are two signs that the Binance Smart Chain was added to your MetaMask wallet. The two red boxes shown in the screenshot below confirm it. The first box above shows the BNB token standard, and the bottom right shows "Smart Chain was successfully added."

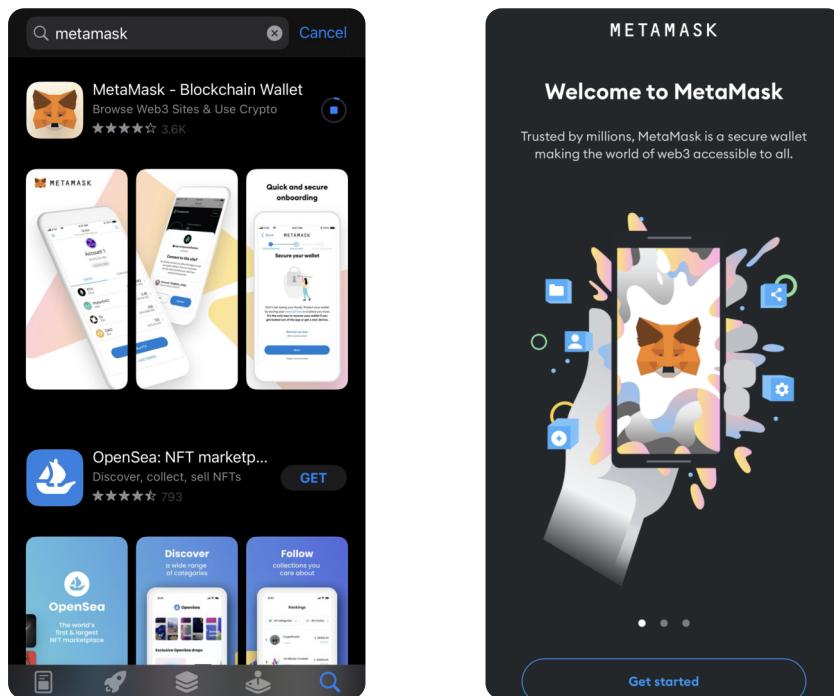

# Creating a MetaMask Wallet Go-To Guide

## iOS / Android APP

You can download the MetaMask app on [Android](#) or [iPhone](#). We'll be using an iPhone as the example here. If you're using an Android phone, the steps to download and install are very similar. Once installed, MetaMask works the same regardless of the phone you have.

To begin, head to the iPhone App Store or Google Play Store, search for MetaMask, and install it.

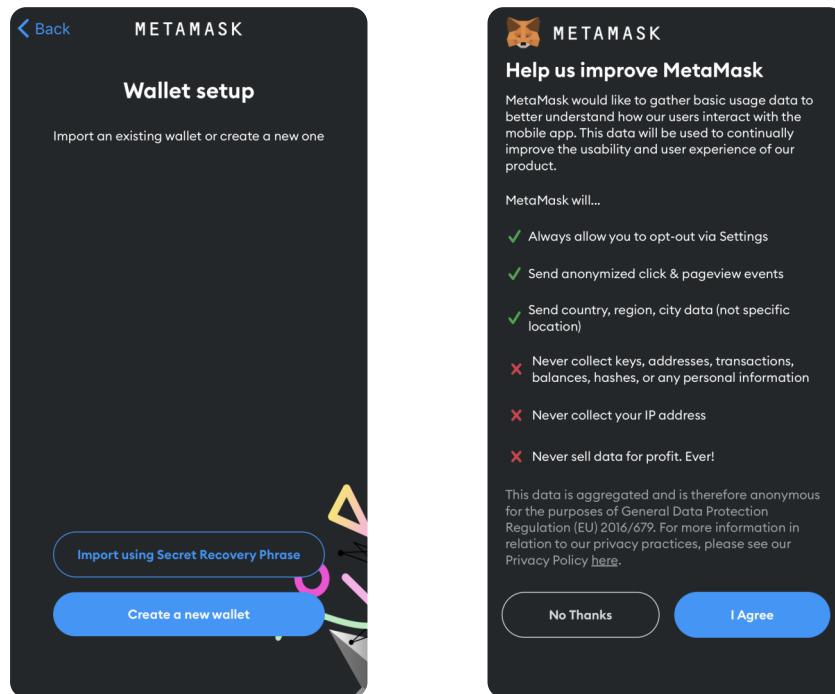

Once downloaded, go ahead and open the MetaMask app from your home screen. With the app open, press "Get started."

After pressing "Get started", you will tap "Create a Wallet". If you already have a wallet select the "Import wallet" option.

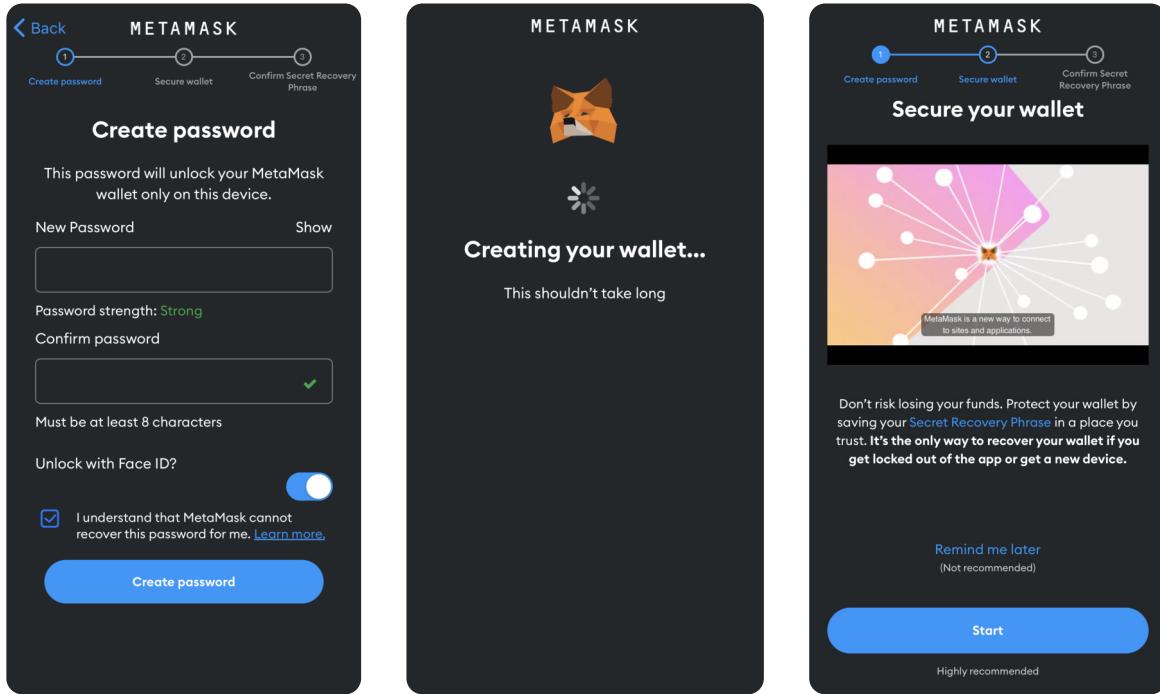

If you installed MetaMask on your browser, you can select this option to integrate your existing wallet into your smartphone app.

The next page will ask whether you want to agree to MetaMask's user agreement. Either option can be selected to proceed.

Now you will create a password for your wallet. Make sure you agree to the Terms of Use. If you use a FaceID you can also enable this option. It is enabled as the default setting.

Before proceeding, watch the video to learn more about the importance of your Secret Recovery Phrase.

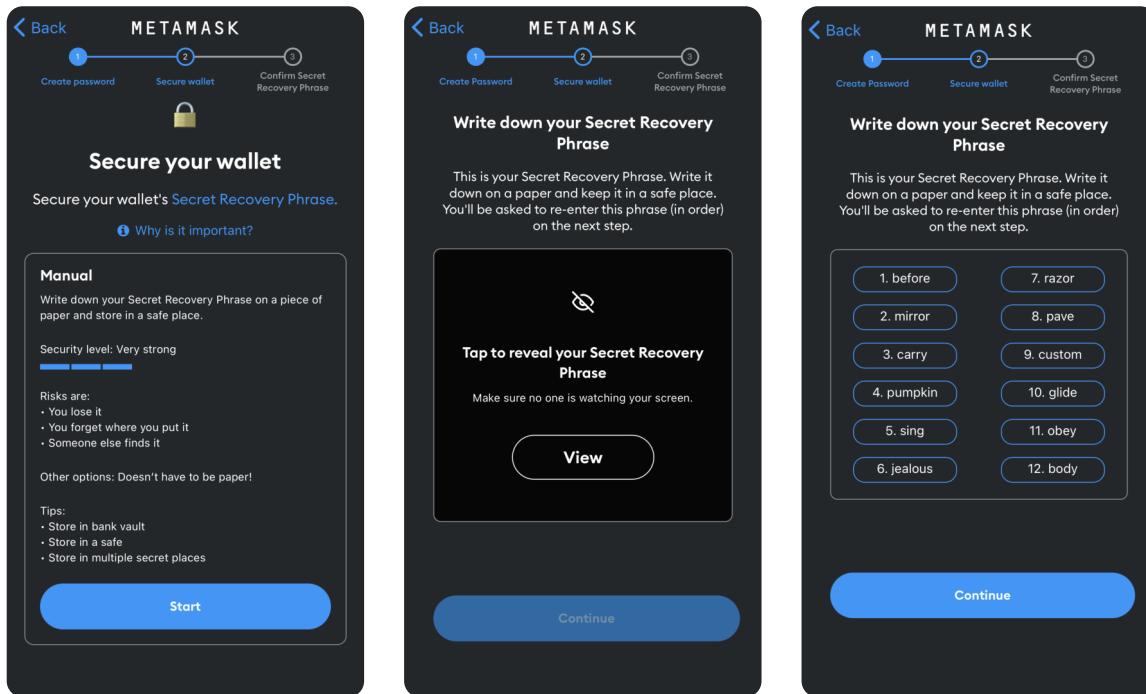

Now you will be granted access to your Secret Recovery Phrase. Your Secret Recovery Phrase is the most important piece of information.

**Warning:** Do not lose or forget your Secret Recovery Phrase. If you forget your password your Secret Recovery Phrase is the only way to access your wallet. If someone else knows your Secret Recovery Phrase, they can access your wallet.

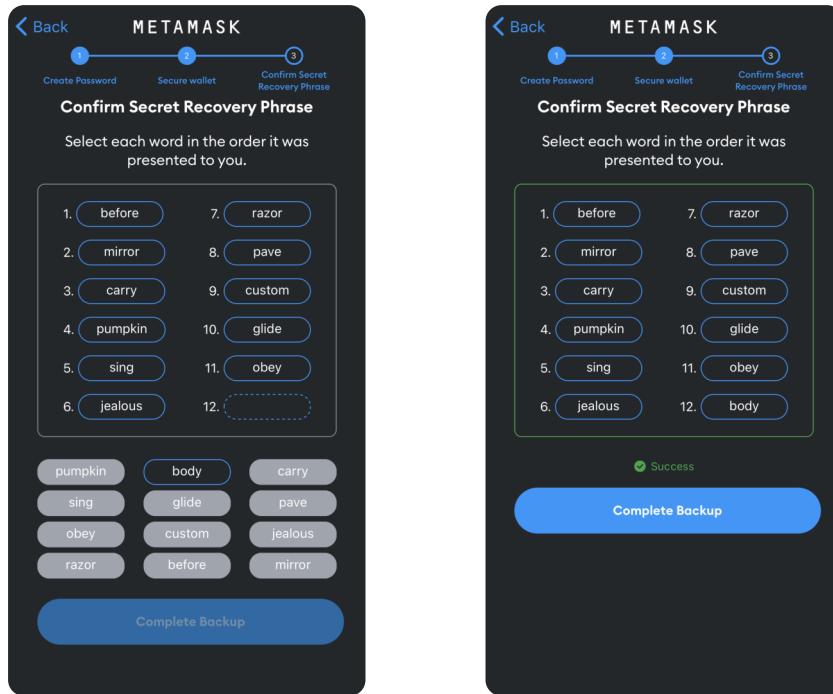

Write your Secret Recovery Phrase down on a piece of paper. Do not store them on your computer. Make sure you always know where your Secret Recovery Phrase is saved.

Click on the box that says "View". Write down your Secret Recovery Phrase.

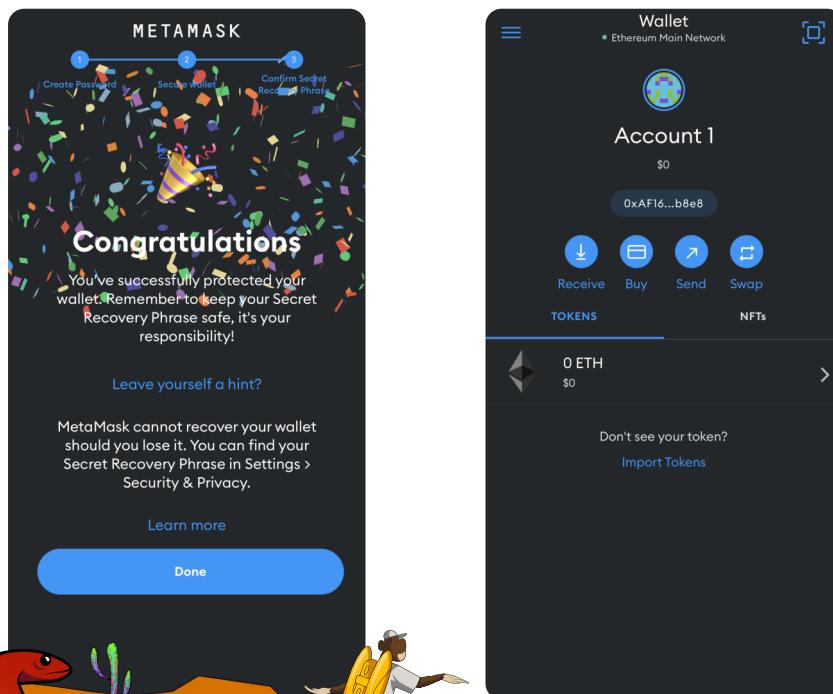

After writing down your Secret Recovery Phrase, tap the words in the order they appeared and press "Continue"

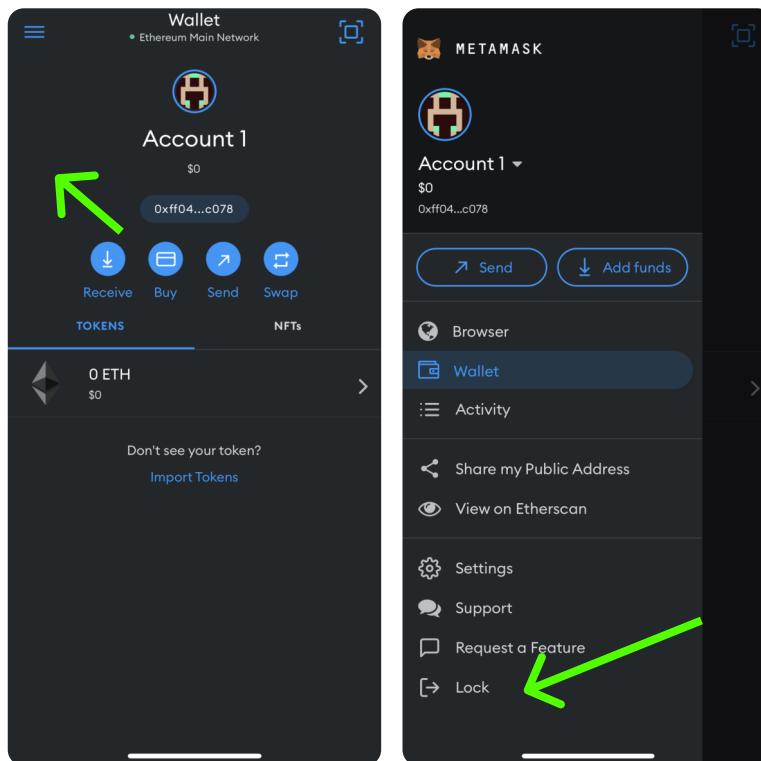

And there you go. You have now created a MetaMask wallet. You can view your account balance, buy and send Ethereum, and view recent activity.

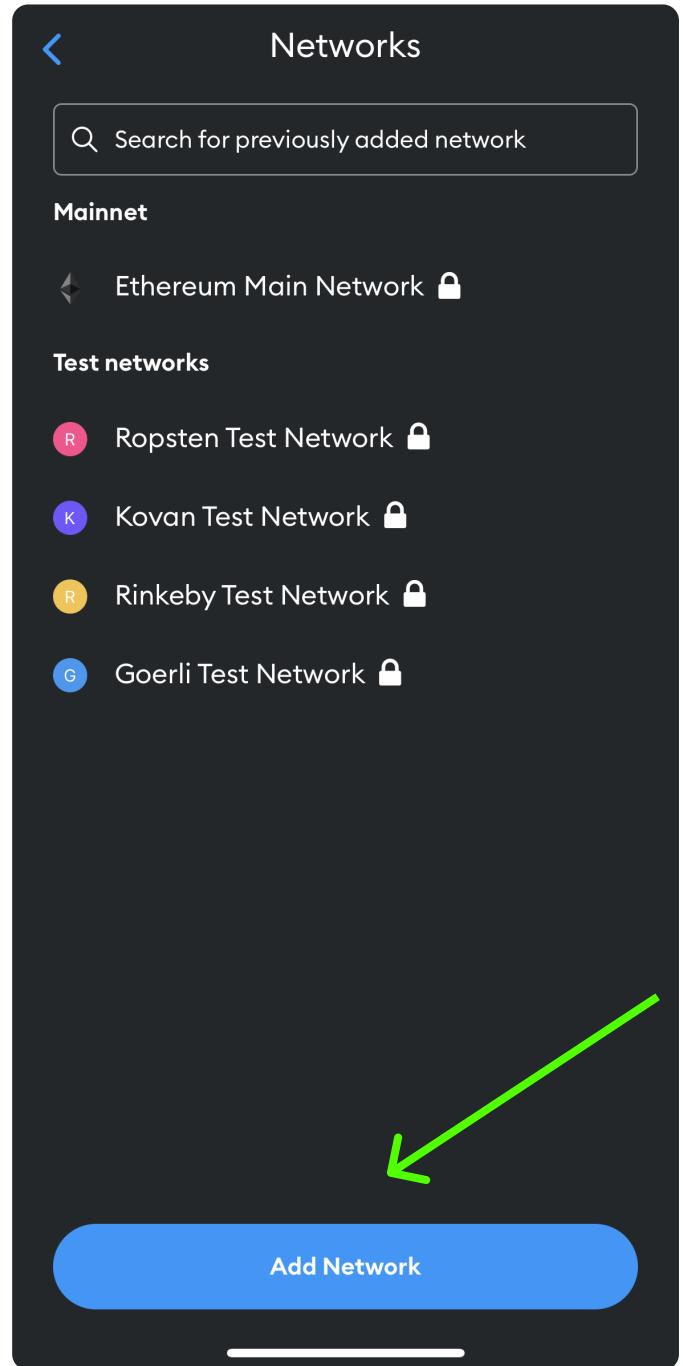

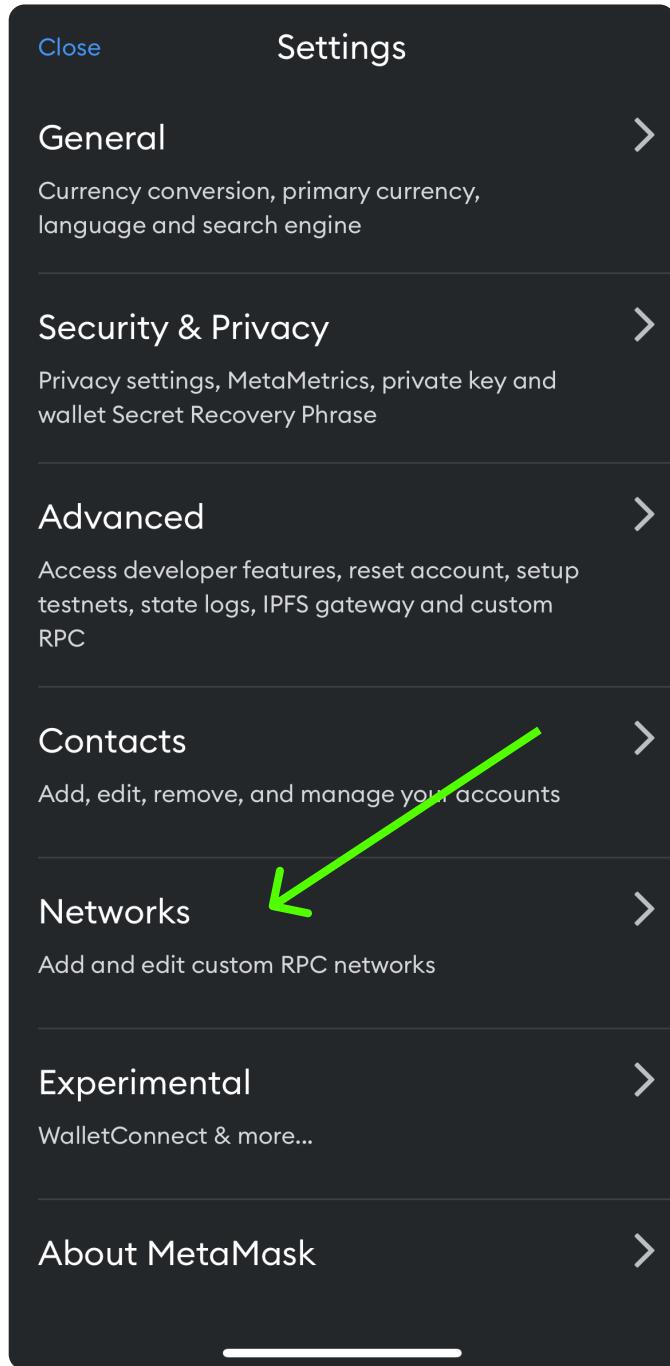

# How to add the Binance Smart Chain on MetaMask

On the mobile wallet application, everything is done in the same manner, you just need to go to the menu for adding networks through the settings. Below I attach several screenshots of the process for clarity.

Initially, MetaMask only functions on the Ethereum (ERC-20) network, so in order to expand its functionality, you will need to add the Binance Smart Chain (BEP-20) network. As I mentioned earlier, since transactions on the Ethereum network are quite expensive and take a long time, many people use the BSC network, especially when transferring small amounts. Additionally, various tokens can be exchanged cheaply in this network.

- Arbitrum One Add
- BNB Smart Chain ⚠ Add
- Fantom Opera ⚠ Add
- Harmony Mainnet Shard 0 ⚠ Add
- Optimism Add
- Polygon Mainnet Add
- Palm Add

< Networks

POPULAR CUSTOM NETWORKS

**⚠** A malicious network provider can lie about the state of the blockchain and record your network activity. Only add custom networks you trust.

Network Name Binance Smart Chain

RPC Url https://bsc-dataseed.binance.org/

Chain ID 56

Symbol BNB

Block Explorer URL https://bscscan.com

**Add**

Done

Wallet  
• Binance Smart Chain

You have switched to  
 Binance Smart Chain

Things to keep in mind:

1. The native token on this network is BNB. It is the token used for gas fees.
2. If you attempt to send assets directly from one network to another, this may result in permanent asset loss. Make sure to use a bridge. [Learn more](#)
3. Token detection is enabled so tokens will automatically show up in your wallet. You can also add tokens manually.

**Got it**

Wallet  
• Binance Smart Chain

Account 1  
\$0  
0xAF16...b8e8

 Receive    Buy    Send    Swap

TOKENS   NFTs

 0 BNB  
\$0

Don't see your token?  
[Import Tokens](#)

I would also like to add that all transactions in the BSC network require commission in BNB. Therefore, we suggest to always keep a couple of dollars worth of this currency in your wallet. All transactions on this network are cheap, costing about 5-30 cents in their BNB equivalent.

If necessary, you can change your network from the Binance Smart Chain to Ethereum and vice versa at any time.

**Get your profit!**
